## Incredible Stingray Style on an Electric Bike!

Electric bicycles are no longer just functional, they are now becoming stylish. With the [Schwinn Stingray Electric Bicycle \(S2938\)](#) you have an electric motorized bike that looks almost like a motorcycle while maintaining that cool stingray style that put Schwinn on the map 25 years ago with their regular bicycles.

*The Schwinn company has apparently pulled out all of the stops trying to create a unique looking electric motorized bicycle while trying not to sacrifice the function of the vehicle....*

The Schwinn company has apparently pulled out all of the stops trying to create a unique looking electric motorized bicycle while trying not to sacrifice the function of the vehicle. This bike has a stylish adjustable cruising saddle with a built in sissy bar, riveted upholstery and the Schwinn embossed logo. The saddle has rivets along the sides of it to give it that "hog" look and the bike is painted black to offset the chrome features.

The ebike sports 4 inch rise cruising handlebars which are chrome as well as the chrome steel chain guard and heavy duty double leg kickstand. It just looks beautiful against the solid black frame and gives the look an authentic feel.

Also, there is a removable, rechargeable battery system looks like a V-Twin engine and can be charged on or off the bike. And to really nail down the hot look of this cycle it features two Alloy 20" x 4" Big Boa rear and 24" x 2" front wheels to really let you hit the road!

## Performance Meets or Exceeds Looks

With the [Schwinn Electric Stingray Bicycle](#) you won't be disappointed with it's performance either. The company's engineers have elected to allow you to use either electric power or enable you the option of pedaling. This is a real good idea when you want to ride it in a pedaling mode, but then switch to power when you approach hills that can wear you out.

The electric bike can achieve up to a speed of 14 miles an hour by utilizing its dual 12 V lead acid batteries that are carried in a removable case and comes a with quick charge connect or and carrying handle.

The heart of the [Schwinn Electric Stingray Bicycle](#) is its motor. This bike carries its motor in the rear wheel hub which does not take up a lot of space and runs quietly on a 24 V DC 250 watt motor with rechargeable sealed lead acid batteries. You can use the throttle on the handle bar to run easily and gracefully in speeds up to 14 miles per hour.

## ***The Schwinn Electric Stingray Bicycle takes this fun to a whole new level.....***

One of the reasons people purchase electric bicycles is because they enjoy riding them in the fresh open air. The Schwinn Electric Stingray Bicycle takes this fun to a whole new level while providing you with the functionality of cheap, clean transportation. When you see this bike you will have the urge to hop on and have fun while you ride to your destination.
